

PULCRA TEC® NFS

PULCRA TEC® NFS

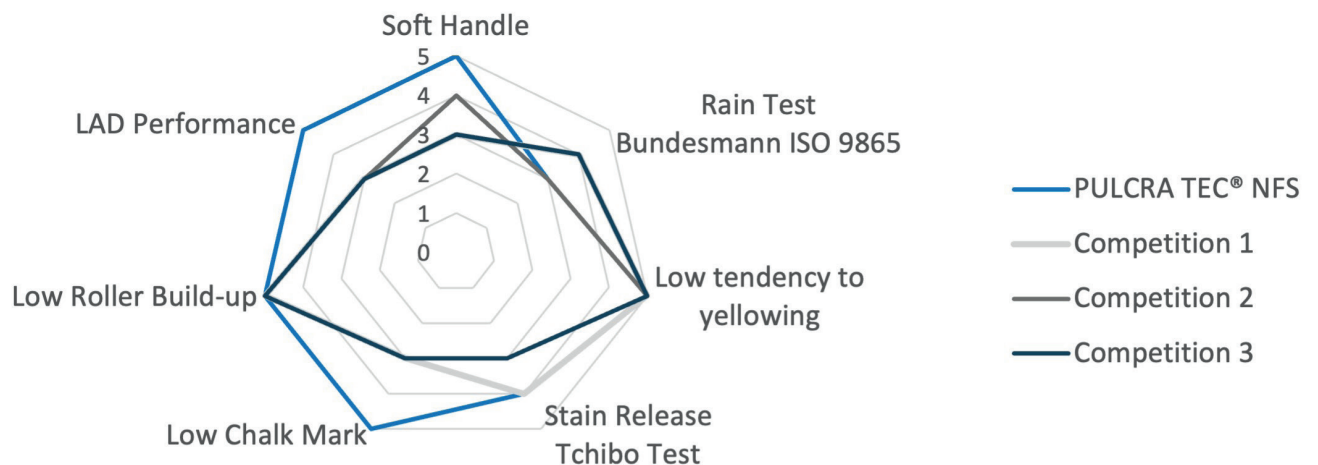

The perfect building block to overcome challenges in DWR finish

Pulcra Chemicals
The solution specialist

PULCRA TEC® NFS is a fluorine-free water repellent which can be used as a building block to tackle challenges which are often faced in DWR finishing. The product offers superior softness, excellent LAD performance and significantly reduced writing effects / chalk marks

BENEFITS:

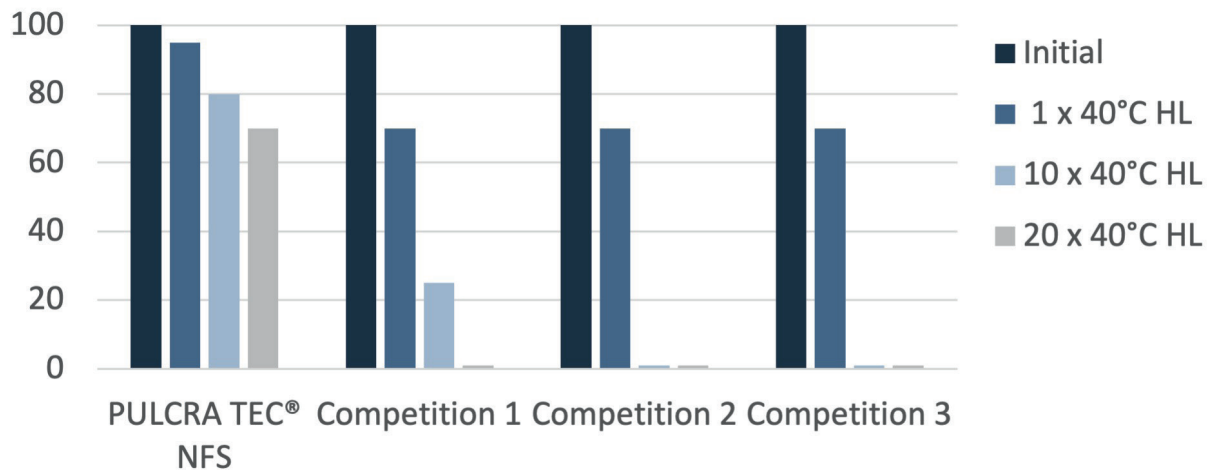

- Fluorine-free, silicone based DWR
- Suitable for synthetic fabrics as well as their blends with cotton
- Part of PULCRA TEC building block system
- Superior handfeel
- Excellent LAD (Laundry Air Dry) performance
- Significantly reduced writing effects / chalk marks
- Good combinability with anionic as well as cationic products
