

STABIFIX® NBF

STABIFIX® NBF

New generation fixing agent for polyamide and its blends

Pulcra Chemicals
The solution specialist

In recent years bisphenols have been restricted due to their classification as endocrine disruptors. STABIFIX® NBF is free of bisphenols, phenol, formaldehyde and is the answer to the growing market demand. This new generation fixing agent provides excellent fastness levels and fully complies with ZDHC and bluesign.

BENEFITS:

- Excellent improvement of polyamide wet fastnesses
- Contains biobased raw materials
- Does not impair the light fastness
- Can be applied to improve the chlorine fastness of acid and metal complex dyes
- Low foaming

Superior performance on
polyamide and blends

Made of plant based
raw material

Free of phenol, bisphenols
and formaldehyde

STABIFIX® NBF

PERFORMANCE OF STABIFIX® NBF on 100% Polyamide
